Derwent Abstract: (DE19802040A) **Novelty** - An automotive disc brake unit (1) has a friction ring (4) joined to a cup-shaped holder (2). The disc brake (1) is detachable from a flange (3) fixed to the vehicle axle. The cylindrical section (6) of the cup-shaped holder (2) has a radial passage (15). During assembly or disassembly the brake disc (1) may be moved radially with respect to the flange (3), enabling the flange (3) to at least partly through the passage (15).

Use - Automotive disc brake.**Advantage** - the assembly and disassembly processes are greatly simplified.
